Overview

We want you to review all the materials from this semester and get some practice in taking exams.

This is a comprehensive final that not only covers everything from CSE 021, but also CSE 020. You should get more comfortable with writing programs on paper. The problems are structured based on the order that we covered various topics in class. So, as you progress through this sample exam, the questions will get harder.

In your first attempt, take the sample exam without any computer aid. Next, check your answers with Eclipse or your notes. Then when you come to the lab session during the last week of instruction (12/6 – 12/12), perform a self-correction session while your TA shows and discusses the answers to the sample exam.

Finally, submit your answers to the 3 questions below to get full credit for this lab assignment.

What to hand in

When you are done with this lab assignment, answer the following 3 questions in a text or Word file, name it **Lab21_12.txt/doc/docx**, and submit:

1. What is your score on the sample exam?
2. Show one problem you fixed with the help of Eclipse or notes (if any)
3. Any topics or problems you have trouble understanding? (if any)

You DO NOT need to submit the answers to the sample exam.
